

### **Spring and Fall Conferences**

OCEA schedules two conferences each year. The Spring conference is usually held in February or March, is a two day conference, and is also the time the state meeting is held, which includes election of officers and any other OCEA-related business. Training is also scheduled during the conference. There is a fee for this conference which includes a catered banquet at which time the newly elected officers are announced and introduced.

The Fall conference is usually held in October and is one day in duration. Training is also included in this conference. Any fees required to attend will be announced; however, at this time it remains free of charge to give everyone an opportunity to attend.
